INDEX OF SUBJECTS

Acid Ultisol and the spatial variability in soil chemical properties under *Dactyladenia barteri, Alchornea cordifolia, Senna siamea* and *Gmelina arborea* hedgerows (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Adoption and diffusion of Carioca beans in Zambia resulting from an experimental distribution of seed (Grisley and Shamambo), 379

Agricultural Extension in East Africa, World Bank Technical Paper 164, by Lisa A. Schwartz and J. Kampen, reviewed by J. F. A. Russell, 248

Agricultural Research Policy: International Quantitative Perspectives, by P. G. Pardey, J. Roseboom and J. R. Anderson, reviewed by T. L. V. Ulbricht, 131

Agroforestry in Africa: A Survey of Project Experience, by P. Kerkof (ed. by G. Foley and G. Barnard), reviewed by R. R. B. Leakey, 388

Agroforestry intercrop situations with observations of some tree root systems, and their graphical representation (Rao, Muraya and Huxley), 183

Agronomic and environmental effects on the growth of four peanut cultivars in a sub-tropical environment. I. Dry matter accumulation and radiation use efficiency (Bell, Wright and Harch), 473; II. Dry matter partitioning (Bell, Wright and Harch), 491

Agronomic management and guidelines for its improvement along with economic evaluation of crop rotation trials in Mediterranean environments (Keatinge and Somel), 437

Aid to African Agriculture: Lessons from Two Decades of Donors' Experience, ed. by Uma Lele, reviewed by J. K. Coulter, 387

Alchornea cordifolia, Dactyladenia barteri, Senna siamea and *Gmelina arborea* hedgerows on an acid Ultisol and the spatial variability in soil chemical properties under them (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Alfisols and the comparison of extra-short-duration pigeonpea with short-season legumes under rainfed conditions on them (Nam, Chauhan and Johansen), 307

Alley farming systems (Leucaena and Gliricidia) in western Nigeria and the effect of taking a fodder crop on maize grain yield and soil chemical properties in them (Larbi, Jabbar, Atta-Krah and Cobbina), 317

Altitude, temperature and shoot production of tea in the Kenyan Highlands (Squire, Obaga and Othieno), 107

Analysis of data in agricultural experimentation. III. Multiple comparisons (Pearce), 1

Analysis of the adoption and diffusion of Carioca beans in Zambia resulting from an experimental distribution of seed (Grisley and Shamambo), 379

Arabica coffee (compact) hybrid cultivar Ruiru 11 and the effects of intercropping young plants with potatoes, tomatoes, beans and maize on coffee yields and economic returns in Kenya (Njoroge, Waithaka and Chweya), 373

Asparagus, by E. Fehér (translated by F. Miszory), reviewed by Stefan T. Buczacki, 248

Basic Guide to Pesticides: Their Characteristics and Hazards, ed. by S. A. Briggs *et al*, reviewed by E. C. Hislop, 524

Bean (local experts) and on-station selection in Rwanda: rethinking the farmer's role in plant breeding (Sperling, Loevinsohn and Ntabomvura), 509

Beans (Carioca) and an analysis of their adoption and diffusion in Zambia resulting from an experimental distribution of seed (Grisley and Shamambo), 379

Beans, potatoes, tomatoes and maize and the effects of intercropping young plants of the compact arabica coffee hybrid cultivar Ruiru 11 with them on coffee yields and economic returns in Kenya (Njoroge, Waithaka and Chweya), 373

Biodiversity of Microorganisms and Invertebrates (The): Its Role in Sustainable Agriculture. (CASAFA Report Series No. 4.) ed. by D. L. Hawksworth, reviewed by M. W. Shaw, 133

Biological Control by Natural Enemies, by P. Debach and D. Rosen, reviewed by S. D. Wratten, 131

Biomass production and methods of identifying genetic diversity in *Gliricidia* species (Chamberlain and Galwey), 87

Biotechnologies in Perspective: Socio-Economic Implications for Developing Countries, ed. by A. Sasson and V. Costarini, reviewed by E. Pehu, 521

Camellia sinensis (tea) and its responses to irrigation and fertilizer. III. Shoot extension and development (Stephens and Carr), 323

Carioca beans and an analysis of their adoption and diffusion in Zambia resulting from an experimental distribution of seed (Grisley and Shamambo), 379

Changes in Varietal Distribution of Cereals in Central and Western Europe, by F. G. H. Lupton, reviewed by W. E. H. Fiddian, 390

Coconut and statistical analysis of field experiments using fewer recordings (Peiris), 207

Coconut Production: Present Status and Priorities for Research, World Bank Technical Paper 136, ed. by A. H. Green, reviewed by R. H. V. Corley, 246

Common Beans: Research for Crop Improvement, ed. by A. van Schoonhoven and O. Yovest, reviewed by J. A. Bailey, 134

Competition and the impact of varying levels of it from pearl millet on the yields of groundnut cultivars (Ndunguru and Williams), 29

Contour hedgerows and a case of farmer adaptation and adoption for soil conservation (Fujisaka), 97

Cowpea and millet growth and yield in relay and intercrop systems in the Sahelian zone in years when the onset of the rainy season is early (Sivakumar), 417

Crop Ecology: Productivity and Management in Agricultural Systems, by R. S. Loomis and D. J. Connor, reviewed by D. S. H. Drennan, 391

Dactyladenia barteri, Alchornea cordifolia, Senna siamea and *Gmelina arborea* hedgerows on an acid Ultisol and the spatial variability in soil chemical properties under them (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Data collection on labour use in on-farm trials in sub-Saharan Africa (Spencer), 39

Data analysis in agricultural experimentation. III. Multiple comparisons (Pearce), 1

Depth of planting, temperature and soil water status effects on germination and emergence of maize (*Zea mays*) adapted to semi-arid eastern Kenya (Itabari, Gregory and Jones), 351

Desert Development: Part 1 Desert Agriculture, Ecology and Biology, ed. by A. Bishay and H. Dregne, reviewed by L. S. Anderson, 522; *Part 2 Socio-economic Assets Renewable Energy Applications*, 522

Desertified Grasslands: Their Biology and Management, Linnean Society Series No. 13, ed. by G. P. Chapman, M. J. T. Norman

Dictionary of Plant Pathology (A), by P. Holliday, reviewed by D. J. Royle, 249

Diffusion of Carioca beans in Zambia with analysis of their adoption resulting from an experimental distribution of seed (Grisley and Shamambo), 379

Dissemination of new technology in a farming systems research and extension programme: diffusion of rice varieties in an area with poor production potential (Wijeratne and Chandrasiri), 503

Drainage water and nitrogen fertilization and their interacting influence on wheat growth (Al-Abdulsalam, Al-Tahir, Al-Jasim and Burhan), 195

Drought stress and the effect of it and heat on sorghum (*Sorghum bicolor*). I. Panicle development and leaf appearance (Craufurd, Flower and Peacock), 61; II. Grain yield, (Craufurd and Peacock), 77

Economic evaluation and guidelines for its improvement along with agronomic management of crop rotation trials in Mediterranean environments (Keatinge and Somel), 437

Economic returns in Kenya and the effects of intercropping young plants of the compact arabica coffee hybrid Ruiru 11 with potatoes, tomatoes, beans and maize on coffee yields (Njoroge, Waithaka and Chweya), 373

Ecophysiology of Vascular Halophytes, by I. A. Ungar, reviewed by J. Gorham, 526

Ecotoxicology of Earthworms, ed. by P. W. Greig-Smith, H. Becker, P. I. Edwards and F. Heimbach, reviewed by J. Baten, 390

Emergence and germination of maize (*Zea mays*) adapted to semi-arid eastern Kenya and the effects of temperature, soil water status and depth of planting (Itabari, Gregory and Jones), 351

Environmental and agronomic effects on the growth of four peanut cultivars in a sub-tropical environment. I. Dry matter accumulation and radiation use efficiency (Bell, Wright and Harch), 473; II. Dry matter partitioning (Bell, Wright and Harch), 491

Environments (Mediterranean) and guidelines for improved agronomic management and economic evaluation of crop rotation trials (Keatinge and Somel), 437

Extension programme and farming systems research and dissemination of new technology: diffusion of rice varieties in an area with poor production potential (Wijeratne and Chandrasiri), 503

Faba bean and its yield and water use efficiency when sown at two row spacings and seed densities (Silim and Saxena), 173

Farmer adaptation and adoption of contour hedgerows for soil conservation (Fujisaka), 97

Farmer-Financed Irrigation: The Economics of Reform, by L. E. Small and I. Carruthers, reviewed by R. Carter, 246

Farmer's role in plant breeding: local bean experts and on-station selection in Rwanda (Sperling, Loevinsohn and Ntabomvura), 509

Farming systems (Leucaena and Gliricidia alley) in western Nigeria and the effect of taking a fodder crop on maize grain yield and soil chemical

properties in them (Larbi, Jabbar, Atta-Krah and Cobbina), 317

Farming systems research and extension programme and dissemination of new technology: diffusion of rice varieties in an area with poor production potential (Wijeratne and Chandrasiri), 503

Farming systems research in Pakistan and agricultural research strategies for favoured and marginal areas (Byerlee and Husain), 155

Fertilizer and irrigation and the responses to them of tea (*Camellia sinensis*). III. Shoot extension and development (Stephens and Carr), 323

Fertilizer and optimizing its use and practical rainfall capture in a semi-arid environment with variable rainfall (Piha), 405

Fertilizer, light, temperature and irrigation effects on photosynthetic rate in tea (*Camellia sinensis*) (Smith, Stephens, Burgess and Carr), 291

Fertilizers (nitrogen and phosphorus) and the responses of a forage hay crop to their residual effects in on-farm trials in northern Syria (Wahbi, Matar and Jones), 429

Flowering and the reliable prediction of its time in six annual crops. II. Soyabean (*Glycine max*) Summerfield, Lawn, Qi, Ellis, Roberts, Chay, Brouwer, Rose, Shanmugasundaram, Yeates and Sandover), 253

Fodder crop and the effect of taking it on maize grain yield and soil chemical properties in Leucaena and Gliricidia alley farming systems in western Nigeria (Larbi, Jabbar, Atta-Krah and Cobbina), 317

Foods of Plant Origin. Technology and Human Nutrition, ed. by D. K. Salunke and S. S. Despande, reviewed by A. Grandison, 246

Forage hay crop responses to the residual effects of nitrogen and phosphorus fertilizers in on-farm trials in northern Syria (Wahbi, Matar and Jones), 429

Fundamentals of Plant Breeding, by H. Kuckuck, G. Kobabe and G. Wenzel, reviewed by P. D. S. Caligari, 131

Genetic diversity and methods of identifying it in *Gliricidia* species for biomass production (Chamberlain and Galwey), 87

Genotype, plant population and soil moisture effects on lodging in lentil (Ibrahim, Erskine, Hanti and Fares), 201

Germination and emergence of maize (*Zea mays*) adapted to semi-arid eastern Kenya and the effects of temperature, soil water status and depth of planting (Itabari, Gregory and Jones), 351

Gliricidia and Leucaena alley farming systems in western Nigeria and the effect of taking a fodder crop on maize grain yield and soil chemical properties in them (Larbi, Jabbar, Atta-Krah and Cobbina), 317

Gliricidia species and methods of identifying genetic diversity in them for biomass production (Chamberlain and Galwey), 87

Glycine max (soyabean) and the response of seed longevity to moisture content in three genotypes (Zanakis, Ellis and Summerfield), 449

Glycine max (Soyabean). Towards the reliable prediction of time to flowering in six annual crops. II. (Summerfield, Lawn, Qi, Ellis, Roberts, Chay, Brouwer, Rose, Shanmugasundaram, Yeates and Sandover), 253

Gmelina arborea, Dactyladenia barteri, Alchornea cordifolia and *Senna siamea* hedgerows on an acid Ultisol and the spatial variability in soil chemical properties under them (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Grain yield (maize) and the effect of taking a fodder crop on it and soil chemical properties in Leucaena and Gliricidia alley farming systems in western Nigeria (Larbi, Jabbar, Atta-Krah and Cobbina), 317

Graphical representation and observations of some tree root systems in agroforestry intercrop situations (Rao, Muraya and Huxley), 183

Grass Evolution and Domestication, ed. by G. P. Chapman, reviewed by M. J. T. Normau

Groundnut cultivar yields: the impact of varying levels of competition from pearl millet (Ndunguru and Williams), 29

Growth and yield of millet and cowpea in relay and intercrop systems in the Sahelian zone in years when the onset of the rainy season is early (Sivakumar), 417

Growth of four peanut cultivars and environmental and agronomic effects in a sub-tropical environment. I. Dry matter accumulation and radiation use efficiency (Bell, Wright and Harch), 473; II. Dry matter partitioning (Bell, Wright and Harch), 491

Growth (shoot) and the yield of tea and the effects on them of soil moisture and vapour pressure deficits in the Kenyan Highlands (Odhiambo, Nyabundi and Chweya), 341

Hay (forage) crop responses to the residual effects of nitrogen and phosphorus fertilizers in on-farm trials in northern Syria (Wahbi, Matar and Jones), 429

Hedgerows grown on the contour for soil conservation: a case of farmer adaptation and adoption (Fujisaka), 97

Hedgerows on an acid Ultisol and the spatial variability in soil chemical properties under *Dactyladenia barteri, Alchornea cordifolia, Senna siamea* and

Gmelina arborea (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365
Heat and the effect of it and drought stress on sorghum (*Sorghum bicolor*). I. Panicle development and leaf appearance (Craufurd, Flower and Peacock), 61; II. Grain yield (Craufurd and Peacock), 77

Intercropping young plants of the compact arabica coffee hybrid cultivar Ruiru 11 with potatoes, tomatoes, beans and maize and its effects on coffee yields and economic returns in Kenya (Njoroge, Waithaka and Chweya), 373
Intercrop and relay systems and the growth and yield of millet and cowpea in them in the Sahelian zone in years when the onset of the rainy season is early (Sivakumar), 417
Interspecific and Intergeneric Crosses in Cultivated Plants, by A. Belea, translated by B. Haraszios, reviewed by F. G. H. Lupton, 250
Introduction to Plant Diseases: Identification and Management. (Second Edition.), by G. B. Lucas, C. Lee Campbell and L. T. Lucas, reviewed by J. Waller, 250
Irrigation and fertilizer and the responses of tea (*Camellia sinensis*) to them. III. Shoot extension and development (Stephens and Carr), 323
Irrigation, light, temperature and fertilizer effects on photosynthetic rate in tea (*Camellia sinensis*) (Smith, Stephens, Burgess and Carr), 291
Irrigation of Agricultural Crops. Agronomy Monograph No. 30, ed. by B. A. Stewart and D. R. Nielson, reviewed by M. K. V. Carr, 521
Irrigation Management on the Indo-Gangetic Plain. World Bank Technical Paper 129, by D. J. W. Berkoff, reviewed by R. Carter, 245

Kenya and the effects of intercropping young plants of the compact arabica coffee hybrid cultivar Ruiru 11 with potatoes, tomatoes, beans and maize on coffee yields and economic returns there (Njoroge, Waithaka and Chweya), 373
Kenyan Highlands and the altitude, temperature and shoot production of tea (Squire, Obaga and Othieno), 107
Kenyan Highlands and the effects of soil moisture and vapour pressure deficits on shoot growth and the yield of tea there (Odhiambo, Nyabundi and Chweya), 341
Kenya (semi-arid eastern) and the effects of temperature, soil-water status and depth of planting on germination and emergence of maize (*Zea mays*) adapted there (Itabari, Gregory and Jones), 351

Labor and Rainfed Agriculture in West Asia and North Africa, ed. by Dennis Tully, reviewed by W. Janssen, 387
Labour use and collecting meaningful data in on-farm trials in sub-Saharan Africa (Spencer), 39
Late planting effects on early versus late pearl millet genotypes in Niger (Reddy and Visser), 121
Legumes (short-season) in comparison with extra-short-duration pigeonpea under rainfed conditions on Alfisols (Nam, Chauhan and Johansen), 307
Lentil lodging as affected by plant population, soil moisture and genotype (Ibrahim, Erskine, Hanti and Fares), 201
Lentil adaptation to the Mediterranean environment. I. Factors affecting yield under drought conditions (Silim, Saxena and Erskine), 9
Leucaena and Gliricidia alley farming systems in western Nigeria and the effect of taking a fodder crop on maize grain yield and soil chemical properties in them (Larbi, Jabbar, Atta-Krah and Cobbina), 317
Light Microscopy, ed. by D. J. Rawlins, reviewed by R. J. Pring, 253
Light, temperature, irrigation and fertilizer effects on photosynthetic rate in tea (*Camellia sinensis*) (Smith, Stephens, Burgess and Carr), 291
Lodging in lentil as affected by plant population, soil moisture and genotype (Ibrahim, Erskine, Hanti and Fares), 201

Maize grain yield and the effect of taking a fodder crop on it and soil chemical properties in Leucaena and Gliricidia alley farming systems in western Nigeria (Larbi, Jabbar, Atta-Krah and Cobbina), 317
Maize, potatoes, tomatoes and beans and the effects of intercropping young plants of the compact arabica coffee hybrid cultivar Ruiru 11 with them on coffee yields and economic returns in Kenya (Njoroge, Waithaka and Chweya), 373
Maize (*Zea mays*) adapted to semi-arid eastern Kenya and the effects of temperature, soil water status and depth of planting on its germination and emergence (Itabari, Gregory and Jones), 351
Malawi and clonal responses of tea shoot extension to temperature there (Smith, Harvey and Cannell), 47
Marginal and favoured areas and agricultural research strategies for them: the experience of farming systems research in Pakistan (Byerlee and Husain), 155
Medicago spp and seed and seedling dynamics over four consecutive years from a single seed set of six annual medics in north Syria (Cocks), 461
Medics (*Medicago* spp) and seed and seedling dynamics over four consecutive years from a single seed set in north Syria (Cocks), 461
Mediterranean environment and the adaptation of

lentil. I. Factors affecting yield under drought conditions (Silim, Saxena and Erskine), 9
Mediterranean environments and guidelines for improved agronomic management and economic evaluation of crop rotation trials (Keatinge and Somel), 437
Millet and cowpea growth and yield in relay and intercrop systems in the Sahelian zone in years when the onset of the rainy season is early (Sivakumar), 417
Moisture content and the response of seed longevity to it in three genotypes of soyabean (*Glycine max*) (Zanakis, Ellis and Summerfield), 449

Nematodes of plants and sustainability in tropical agriculture (Page and Bridge), 139
Niger and late planting effects on early versus late pearl millet genotypes (Reddy and Visser), 121
Nigeria and field evaluation of the possible impact of some pesticides on the soil and water environment (Sangodoyin), 227
Nitrate and Farming Systems, ed. by J. R. Archer *et al*, reviewed by T. M. Addiscott, 523
Nitrogen and phosphorus fertilizers and the responses of a forage hay crop to the residual effects of them in on-farm trials in northern Syria (Wahbi, Matar and Jones), 429
Nitrogen fertilization and drainage water influencing wheat growth by interaction (Al-Abdulsalam, Al-Tahir, Al-Jasim and Burhan), 195
Nitrogen Fixation in Tropical Cropping Systems, by K. E. Giller and K. J. Wilson, reviewed by M. Wood, 250
Nitrogen Metabolism of Plants (Proceedings of the Phytochemical Society of Europe: 33), ed. by K. Mengel and D. J. Pilbeam, reviewed by E. J. Hewitt, 134

On-farm trials in northern Syria and the responses of a forage hay crop to the residual effects of nitrogen and phosphorus fertilizers (Wahbi, Matar and Jones), 429
On-farm trials in sub-Saharan Africa and collecting meaningful data on labour use (Spencer), 39

Pakistan and the experience of farming systems research and agricultural research strategies for favoured and marginal areas (Byerlee and Husain), 155
Peanut cultivars (four) and environmental and agronomic effects on their growth in a sub-tropical environment. I. Dry matter accumulation and radiation use efficiency (Bell, Wright and Harch), 473; II. Dry matter partitioning (Bell, Wright and Harch), 491
Pearl millet and the effects of high soil surface temperature on seedling survival (Peacock, Soman, Jayachandran, Rani, Howarth and Thomas), 215
Pearl millet and the impact of varying levels of competition from it on the yields of groundnut cultivars (Ndunguru and Williams), 29
Pearl millet and late planting effects on early versus late genotypes in Niger (Reddy and Visser), 121
Pesticides (some) and the field evaluation of their possible impact on the soil and water environment in Nigeria (Sangodoyin), 227
Phosphorus and nitrogen fertilizers and the responses of a forage hay crop to their residual effects in on-farm trials in northern Syria (Wahbi, Matar and Jones), 429
Physiology of Herbicide Action, ed. by M. Divine, S. O. Duke and C. Fedtke, reviewed by A. Dodge, 524
Pigeonpea and the adaptation of extra short duration genotypes to rainfed semi-arid environments (Chauhan, Johansen and Singh), 233
Pigeonpea (extra-short-duration) compared with short-season legumes under rainfed conditions on alfisols (Nam, Chauhan and Johansen), 307
Pigeonpea (The), ed. by Y. L. Nene, S. D. Hall and V. K. Sheila, reviewed by J. A. Bailey, 133
Planned Change in Farming Systems: Progress in On-farm Research, by R. Tripp, reviewed by J. G. W. Jones, 132
Plantation Forestry in the Tropics: Tree Planting for Industrial, Social, Environmental and Agroforestry Purposes (Second Edition), by J. Evans, reviewed by R. R. B. Leakey, 392
Plant Genetic Manipulation for Crop Protection, ed. by A. M. R. Gatehouse, V. A. Hilder and D. Boulter, reviewed by J. Antoniw, 527
Plant Genetic Resources of Ethiopia, ed. by J. M. M. Engels, J. G. Hawkes and Melaku Worede, reviewed by B. Pickersgill, 245
Plant Breeding in the 1990s, ed. by H. T. Stalker and J. P. Murphy, reviewed by F. G. H. Lupton, 526
Planting depth, temperature and soil water status effects on germination and emergence of maize (*Zea mays*) adapted to semi-arid eastern Kenya (Itabari, Gregory and Jones), 351
Planting late and its effects on early versus late pearl millet genotypes in Niger (Reddy and Visser), 121
Plant nematodes and sustainability in tropical agriculture (Page and Bridge), 139
Plant population, soil moisture and genotype affecting lodging in lentil (Ibrahim, Erskine, Hanti and Fares), 201
Plant Tissue Culture: Techniques and Experiments, by R. A. Smith, reviewed by A. R. Belcher, 390
Plants and Microclimate (Second Edition), by Hamlyn G. Jones, reviewed by J. L. Monteith, 389

Potatoes, tomatoes, beans and maize and the effects of intercropping young plants of the compact arabica coffee hybrid cultivar Ruiru 11 with them on coffee yields and economic returns in Kenya (Njoroge, Waithaka and Chweya), 373

Prediction of time to flowering in six annual crops. II. Soyabean (*Glycine max*) (Summerfield, Lawn, Qi, Ellis, Roberts, Chay, Brouwer, Rose, Shanmugasundaram, Yeates and Sandover), 253

Rainfall capture in a semi-arid environment with variable rainfall and optimizing fertilizer use (Piha), 405

Rainfed conditions on Alfisols and the comparison of extra-short-duration pigeonpea with short-season legumes (Nam, Chauhan and Johansen), 307

Rainfed semi-arid environments and the adaptation of extra short duration pigeonpea to them (Chauhan, Johansen and Singh), 233

Rainy season when its onset in the Sahelian zone is early and the growth and yield of millet and cowpea in relay and intercrop systems (Sivakumar), 417

Relay and intercrop systems and the growth and yield of millet and cowpea in them in the Sahelian zone in years when the onset of the rainy season is early (Sivakumar), 417

Release of Genetically Engineered and Other Microorganisms, ed. by J. C. Fry and M. J. Day, reviewed by P. Hirsch, 527

Residual effects of nitrogen and phosphorus fertilizers and the responses of a forage hay crop to them in on-farm trials in northern Syria (Wahbi, Matar and Jones), 429

Rice varieties and their diffusion in an area with poor production potential: dissemination of new technology in a farming systems research and extension programme (Wijeratne and Chandrasiri), 503

Rice (wet-seeded) and weed control (Moody), 393

Risk in Agriculture (Proceedings of the Tenth Agriculture Sector Symposium), ed. by D. Holden, P. Hazell and A. Pritchard, reviewed by D. J. Greenland, 247

Rotation (crop trials) and guidelines for improved agronomic management and economic evaluation of them in Mediterranean environments (Keatinge and Somel), 437

Row spacings and seed densities and yield and water use efficiency of faba bean (Silim and Saxena), 173

Rwanda and local bean experts and on-station selection: rethinking the farmer's role in plant breeding (Sperling, Loevinsohn and Ntabomvura), 509

Sahelian zone and the growth and yield of millet and cowpea in relay and intercrop systems in years when the onset of the rainy season is early (Sivakumar), 417

Seed Analysis. Modern Methods of Plant Analysis, New Series Vol. 15, ed. by H. F. Linskens and J. F. Jackson, reviewed by P. R. Shewry, 525

Seed and an analysis of the adoption and diffusion of Carioca beans in Zambia resulting from an experimental distribution (Grisley and Shamambo), 379

Seed and seedling dynamics over four consecutive years from a single set of six annual medics (*Medicago* spp) in north Syria (Cocks), 461

Seed densities and row spacings (two) and yield and water use efficiency of faba bean (Silim and Saxena), 173

Seedling survival in pearl millet and the effects of high soil surface temperature (Peacock, Soman, Jayachandran, Rani, Howarth and Thomas), 215

Seed longevity response to moisture content in three genotypes of soyabean (*Glycine max*) (Zanakis, Ellis and Summerfield), 449

Seed System Development: The Appropriate Roles of Private and Public Sectors. World Bank Discussion Paper 167, by S. Jaffee and J. Srivastava, reviewed by R. H. Ellis, 391

Semi-arid eastern Kenya and the effects of temperature, soil water status and depth of planting on germination and emergence of maize (*Zea mays*) adapted there (Itabari, Gregory and Jones), 351

Senna siamea, Dactyladenia barteri, Alchornea cordifolia and *Gmelina arborea* hedgerows on an acid Ultisol and the spatial variability in soil chemical properties under them (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Shoot growth and the yield of tea and the effects on them of soil moisture and vapour pressure deficits in the Kenyan Highlands (Odhiambo, Nyabundi and Chweya), 341

Shoot production of tea and altitude and temperature in the Kenyan Highlands (Squire, Obaga and Othieno), 107

Soil and water environment in Nigeria and the field evaluation of the possible impact of some pesticides (Sangodoyin), 227

Soil chemical properties and their spatial variability under *Dactyladenia barteri, Alchornea cordifolia, Senna siamea* and *Gmelina arborea* hedgerows on an acid Ultisol (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Soil chemical properties in Leucaena and Gliricidia alley farming systems in western Nigeria and the effect of taking a fodder crop on them and on maize grain yield (Larbi, Jabbar, Atta-Krah and Cobbina), 317

Soil conservation and a case of farmer adaptation and adoption of contour hedgerows (Fujisaka), 97

Soil moisture and its effect along with vapour pressure deficits on shoot growth and the yield of tea in the Kenyan Highlands (Odhiambo, Nyabundi and Chweya), 341

Soil moisture, plant population and genotype affecting lodging in lentil (Ibrahim, Erskine, Hanti and Fares), 201

Soil surface temperature (high) and the effects on seedling survival in pearl millet (Peacock, Soman, Jayachandran, Rani, Howarth and Thomas), 215

Soil water status, temperature and depth of planting effects on germination and emergence of maize (*Zea mays*) adapted to semi-arid eastern Kenya (Itabari, Gregory and Jones), 351

Sorghum bicolor and the effect of heat and drought stress. I. Panicle development and leaf appearance (Craufurd, Flower and Peacock), 61

Sorghum (*Sorghum bicolor*) and the effect of heat and drought stress on it. I. Panicle development and leaf appearance (Craufurd, Flower and Peacock), 61; II. Grain yield (Craufurd and Peacock), 77

Soyabean (*Glycine max*) and the response of seed longevity to moisture content in three genotypes (Zanakis, Ellis and Summerfield), 449

Soyabean (*Glycine max*). Towards the reliable prediction of time to flowering in six annual crops. II. (Summerfield, Lawn, Qi, Ellis, Roberts, Chay, Brouwer, Rose, Shanmugasundaram, Yeates and Sandover), 253

Spatial variability in soil chemical properties under *Dactyladenia barteri, Alchornea cordifolia, Senna siamea* and *Gmelina arborea* hedgerows on an acid Ultisol (Ruhigwa, Gichuru, Tariah, Isirimah and Douglas), 365

Statistical analysis of field experiments in coconut using fewer recordings (Peiris), 207

Strategies of agricultural research for favoured and marginal areas: the experience of farming systems research in Pakistan (Byerlee and Husain), 155

Sub-Saharan Africa and collecting meaningful data on labour use in on-farm trials (Spencer), 39

Sustainability in tropical agriculture and plant nematodes (Page and Bridge), 139

Sweet Potato: An Untapped Food Resource, by J. A. Wooife, reviewed by N. W. Simmonds, 132

Syria (northern) and the responses of a forage hay crop to the residual effects of nitrogen and phosphorus fertilizers in on-farm trials there (Wahbi, Matar and Jones), 429

Tea and the effect of altitude, temperature on its shoot production of it in the Kenyan Highlands (Squire, Obaga and Othieno), 107

Tea (*Camellia sinensis*) and its responses to irrigation and fertilizer. III. Shoot extension and development (Stephens and Carr), 323

Tea shoot extension and clonal responses to temperature in Malawi (Smith, Harvey and Cannell), 47

Tea yield in the Kenyan Highlands and the effects on it and on shoot growth of soil moisture and vapour pressure deficits (Odhiambo, Nyabundi and Chweya), 341

Technology (new) and its dissemination in a farming systems research and extension programme: diffusion of rice varieties in an area with poor production potential (Wijeratne and Chandrasiri), 503

Temperature and clonal responses of tea shoot extension in Malawi (Smith, Harvey and Cannell), 47

Temperature and altitude and shoot production of tea in the Kenyan Highlands (Squire, Obaga and Othieno), 107

Temperature (high) at the soil surface and its effects on seedling survival in pearl millet (Peacock, Soman, Jayachandran, Rani, Howarth and Thomas), 215

Temperature, light, irrigation and fertilizer effects on photosynthetic rate in tea (*Camellia sinensis*) (Smith, Stephens, Burgess and Carr), 291

Temperature, soil water status and depth of planting effects on germination and emergence of maize (*Zea mays*) adapted to semi-arid eastern Kenya (Itabari, Gregory and Jones), 351

Tools for Agriculture: A Guide to Appropriate Equipment for Smallholder Farmers, by I. Carruthers and M. Rodriquez, reviewed by M. J. Hann, 389

Tomatoes, potatoes, beans and maize and the effects of intercropping young plants of the compact coffee hybrid cultivar Ruiru 11 with them on coffee yields and economic returns in Kenya (Njoroge, Waithaka and Chweya), 373

Tree root systems in agroforestry intercrop situations, observations and graphical representation (Rao, Muraya and Huxley), 183

Trends in Agricultural Diversification. Regional Perspectives. World Bank Technical Paper 180, ed. by S. Barghouti, L. Garbus and D. Umali, reviewed by N. W. Simmonds, 392

Tropical agriculture sustainability and plant nematodes (Page and Bridge), 139

Tropical Grassy Weeds. (CASAFA Report Series No. 2), ed. by F. W. G. Baker and P. J. Terry, reviewed by M. J. T. Norman, 249

Vapour pressure deficits and their effects along with soil moisture on shoot growth and the yield of tea

in the Kenyan Highlands (Odhiambo, Nyabundi and Chweya), 341

Water and soil environment in Nigeria and the field evaluation of the possible impact of some pesticides (Sangodoyin), 227

Water use efficiency and yield of faba bean sown at two row spacings and seed densities (Silim and Saxena), 173

Weather and Yield. (Development in Crop Science 20.), ed. by J. Petr, reviewed by J. R. Porter, 247

Weed control in wet-seeded rice (Moody), 393

Wheat growth as influenced by the interaction of drainage water and nitrogen fertilization (Al-Abdulsalam, Al-Tahir, Al-Jasim and Burhan), 195

Woody Species in Auxiliary Roles—Live Stakes in Yam Cultivation, by A. Budelman, reviewed by J. Evans, 387

World Grain Trade, by Tom Sewell, reviewed by W. E. Fiddian, 527

World Oil Seeds: Chemistry, Technology and Utilisation, by D. K. Salunkhe, J. K. Chavan, R. N. Adsule and S. S. Kadam, reviewed by K. G. Berger, 388

Yield and growth of millet and cowpea in relay and intercrop systems in the Sahelian zone in years when the onset of the rainy season is early (Sivakumar), 417

Yield and water use efficiency of faba bean sown at two row spacings and seed densities (Silim and Saxena), 173

Yield of tea in the Kenyan Highlands and the effects on it and on shoot growth of soil moisture and vapour pressure deficits (Odhiambo, Nyabundi and Chweya), 341

Yields (coffee) and economic returns in Kenya and the effects of intercropping young plants of the compact arabica coffee hybrid cultivar Ruiru 11 with potatoes, tomatoes, beans and maize (Njoroge, Waithaka and Chweya), 373

Yields of groundnut cultivars: the impact of varying levels of competition from pearl millet (Ndunguru and Williams), 29

Zambia and an analysis of the adoption and diffusion of Carioca beans there resulting from an experimental distribution of seed (Grisley and Shamambo), 379

Zea mays (maize) adapted to semi-arid eastern Kenya and the effects of temperature, soil water status and depth of planting on germination and emergence (Itabari, Gregory and Jones), 351
